EDUCATION

University of Virginia, McIntire School of Commerce **Charlottesville, VA**

- *Bachelor of Science* in **Commerce** (*Minor* in **Computer Science**) *Aug. 2023-May 2027 (expected)*
- **Concentration:** Finance | **Tracks:** Quantitative Finance, Analytics and AI
- Cumulative GPA: **3.9**/4.0 | Dean's List: 4 semesters
- Related Courses: Quantitative & Financial Analysis, Intermediate Corporate Finance, Intermediate Accounting, Introduction to Regression Analysis, etc.
- Teaching Assistant: Foundations of Finance, Financial Management
- Currently applying to graduate school | expected graduation time: May 2028

PROFESSIONAL EXPERIENCE

Investment Banking Department Intern | Goldman Sachs GH Securities, Beijing, China *Jun. 2026-Aug. 2026*

- Analyzed product mix and business models of two target companies in AI IIoT and AI agent infrastructure industries, evaluated M&A synergies with potential buyers across product, technology, data, and cost dimensions, and prepared pitchbook materials for buyer outreach
- Built a valuation model for a leading Chinese automaker, forecasting earnings by country and vehicle model, with scenario analysis for Middle East expansion; pitched block trade solution to a regional PE firm to mitigate selling pressure from the client's shareholder lockup expiry

Investment Department Intern | China Mobile Investment, Beijing, China *May 2025-Aug. 2025*

- Authored a 50-page RISC-V industry research report, identifying edge computing investment opportunities driven by the architecture's high compatibility and modular design, and synthesizing insights from stakeholder interviews, market analysis, and RISC-V ISA papers
- Supported $100M investment closing for a robotics manufacturer by drafting project initiation report, conducting commercial and financial due diligence, analyzing unit economics, and building valuation model based on historical performance and expansion assumptions

Private Equity Intern | Portola Growth Partners, New York, NY (Remote) *Jan. 2025-May 2025*

- Researched the pediatric behavioral health sector, screened 100 startups across geography, clinic footprint, business model, and healthcare resources, and identified and contacted five potential investment targets
- Conducted due diligence on Unicare Diagnostics, including EBITDA and margin analysis; evaluated opportunities in ventilator management and home medical equipment sectors driven by increasing prevalence of chronic pediatric illnesses and hospital readmission reduction trends; assessed the company's competitive differentiation, including provider relationships, sub-5% denial rates, and patient management capabilities

Equity Research Intern | HUAXI Securities, Beijing, China *May 2024-Aug. 2024*

- Analyzed 30+ data-center GPU architectures, tracking changes in memory, processors, I/O interfaces, and performance metrics; built a Python-based specification dataset and applied machine learning to forecast next-generation GPU features and differentiation paths that were consistent with NVIDIA's later product releases; completed a 40-page industry research report
- Conducted due diligence on Wanma Technology in China's IoT sector using industry research, market analysis, and Wind financial and valuation data; completed a 17-page due diligence report

PROJECTS & LEADERSHIP

Integrated Core Experience (ICE), McIntire School of Commerce *Sep. 2025-May 2026*

- Designed a new global travel repatriation service proposal for Allianz, estimated the U.S. market size, forecasted revenue and costs, and built a financial model; calculated a 25.09% IRR, conducted sensitivity analysis, and presented the proposal to Allianz executives in a 30-minute presentation and Q&A
- Developed an M&A proposal for Uber's acquisition of GoTo, using Tableau to analyze GoTo's strategic shortcomings; quantified operating and financial synergies, and performed standalone and post-merger DCF analyses; projected $1.9B in total synergy value and designed a half-cash-half-stock deal structure to share risks and preserve Uber's liquidity

Project Lead | UVA Credit & Restructuring Club *Sep. 2024-May 2025*

- Studied debt financing instruments, repayment priority, and bankruptcy and restructuring processes; learned credit and restructuring analysis frameworks through real case studies shared by KKR's restructuring team
- Led a four-member team in a research project on AI-enabled corporate financing, analyzing the use of machine learning and big data in credit assessment, bond pricing, and private credit; evaluated implications for financing efficiency, risk management, and model risks such as black-box risk and data bias

Captain | UVA Chinese Basketball Team *Sep. 2023-present*

- Led twice-weekly practices and developed team tactics, helping the team achieve Triangle League Runner-up and NECBL Division Champion titles
- Secured $4,000 in sponsorship funding through sponsor outreach to support the team's daily operations

SKILLS & INTERESTS

- **Technical Skills:** Python, Java, C; Tableau, RStudio, MySQL, Excel; Wind, Bloomberg, Capital IQ, Crunchbase
- **Interests:** Basketball, Piano, Astronomy
